Please order systems by number. The system is sold in multiples of 15 pads. Component pricing is provided for replacement items only.

Prices may change without prior notice, order acknowledgement confirms, payment on invoice  
All prices + shipping, import duties and local taxes (GST/VAT) where applicable. E&OE

The CLiKAPAD<sup>®</sup> *prioritizer* systems include a CLiKAPAD<sup>®</sup> SuperBase and cables plus all required recharging / carry cases to ship and recharge the system.

The maximum number of CLiKAPAD<sup>®</sup> *prioritizer* keypads supported per expanded charging cases is 135 units. The charging cases are designed to recharge two banks (30 pads) of fully discharged keypads in 1 hour then move on to fully charge the next two banks of 30 pads until complete. Using the mode switch you can change the operation to “boost” charge 30 pads for 15 minutes and move on to the next 30 pads and rotate until charging complete or until the user removes the units from the charging case.

**Spare Slots:**

System 1, 4 & 7 have 30 slots vacant for 2 x extra banks of 15 x pads.

System 2, 5, & 8 have 15 slots vacant for 1 x extra bank of 15 x pads.

System 3, 6 and 9 are complete with no vacant slots.

**System Expansion:**

Purchasers have the opportunity to grow their system by the addition of a CLiKAPAD<sup>®</sup> Expander Unit. This comes complete with PCB and connecting cable and up to a maximum of two CLiKAPAD<sup>®</sup> Expander Units may be added to a CLiKAPAD Base & IE Unit.

Further expansion to the physical limit of the CLiKAPAD<sup>®</sup> SuperBase, 4095 x CLiKAPAD<sup>®</sup> *prioritizers*, is possible by purchasing further complete systems. However, the maximum number per charger “stack” is 135 x CLiKAPAD<sup>®</sup> *prioritizers*
